

Gender Pay Gap

Equity is important to Lendlease. We have committed significant resources to understanding what causes gender pay gaps and how to best address them.

Lendlease employs circa 12,000 people across our diverse business operations and we are committed to ensuring gender equity is a reality for everyone within our company. Over the last six years, Lendlease has actively worked towards achieving our gender pay equity goals through a range of in-depth reviews, processes and communications.

As Lendlease Group CEO and Managing Director Steve McCann shared in the Male Champions of Change Closing the Gender Pay Gap report: "There is no excuse for men to be paid more than women for work that has the same accountability, breadth and difficulty, and for which they have comparable performance, competence and experience."

Steve McCann is a Pay Equity Ambassador for Equal Pay Day
