# LEND LEASE ANNOUNCES NEW ELEPHANT & CASTLE PROJECT DIRECTOR TO START LATER THIS YEAR - PRESS RELEASE

**London, 23 May 2013-** LEND Lease, the integrated property and infrastructure group, today announces that Pascal Mittermaier will become Project Director of the £1.5 billion regeneration of Elephant & Castle later this Summer.

In his role as Head of Sustainability in EMEA Pascal has helped deliver some of the most sustainable developments to date in Britain, including the London 2012 Athletes' Village. He has been closely involved with the Elephant & Castle project throughout its duration and is already embedded within the team in advance of taking up his new position in August.

Before joining Lend Lease, Pascal worked for healthcare company Roche, where he was previously President of its Canada business and Chief Executive Officer of Roche Italy. Pascal will take up his new role in August and will continue to sit on Lend Lease EMEA's Regional Leadership Team where he will champion the Elephant & Castle project as well as other sustainability initiatives.

Pascal will replace Rob Deck, the current Project Director who is returning to Australia to take up a new role leading a major Lend Lease regeneration project.

Lend Lease has made strong progress this year at Elephant & Castle, which is arguably the last major urban regeneration in Zone One of the London Underground. Milestones have included obtaining planning approval of the masterplan for the Heygate Estate and the successful sales launch of more than 500 new homes at One The Elephant and Trafalgar Place.

Mark Dickinson, Managing Director for Development at Lend Lease, said: "I am extremely pleased that Pascal is deepening his involvement with the regeneration of Elephant & Castle. His experience of delivering innovative and large scale developments will play a vital role in transforming this part of Central London into one of the most vibrant places to live in the capital."

"His expertise in sustainability will ensure that the new Elephant & Castle is an exemplar for green building. His approach to sustainability is about creating safe, healthy and enjoyable places to live as well as meeting demanding environmental targets."

"I would also like to thank Rob Deck for his contribution to the progress which we have made at Elephant & Castle."

Pascal Mittermaier added: "I am looking forward to working closely with Southwark Council and the people who live locally to create one of the most exciting and transformative developments which London has seen in decades."

Lend Lease has built more than 3,500 homes in the UK and is one of the leaders in urban regeneration in London. In addition to the regeneration of Elephant & Castle, Lend Lease is also delivering The International Quarter – the new £2bn commercial district at Stratford City in the 2012 Olympic Park which will include 350 new homes.
